REPORT OF THE TRUSTEES.

To His Excellency, JOSEPH W. FIFER, *Governor of Illinois*:

SIR—We have the honor to submit the twenty-first biennial report of the Illinois Institution for the Education of the Blind, for the period ending June 30, 1890.

The number of pupils enrolled during the biennial period was 221. Of these, 37 were adult males, admitted as apprentices in the shop department. The number enrolled during the year ending June 30, 1889, was 165, of whom 91 were males and 74 females; during the year ending June 30, 1889, 187, of whom 106 were males and 81 females. The average attendance during the first school year of the biennial period was 151; during the second school year, 164.

The appropriations made by the last general assembly are, as we believe, being wisely expended in the interest of the unfortunate class committed to our charge.

COTTAGE FOR GIRLS.

Of the $18,000 appropriated for the purpose of building and furnishing a cottage for blind girls, $14,033.93 has been expended (July 1, 1890) and the building is nearly completed. It will, without doubt, be ready for occupancy at the beginning of the next term of school. This will furnish relief from the inconvenience and detriment to health caused by the crowded condition of the dormitories in the main building.

PIANO-TUNING AND REPAIR DEPARTMENT.

A portion of the money appropriated for the equipment of a tuning and repair shop has been expended, and during the past year twenty pupils have been employed in this department under the direction of an experienced and competent instructor. It is believed that through this occupation many blind boys will become self-supporting. While no certificates of proficiency in this department have thus far been granted, the progress made by the pupils has been encouraging and amply justifies the wisdom of the appropriation.

REPAIRS TO CHAPEL.

The amount appropriated for this purpose was sufficient to make such repairs to the chapel as will insure safety to the building and to the large audiences that sometimes gather within its walls. The chapel has been somewhat enlarged, decorated, and otherwise improved, so that we now have a pleasant and commodious room in which to assemble for our religious exercises, and for such entertainments as are given by the pupils from time to time.

OTHER REPAIRS AND IMPROVEMENTS.

The unsightly hedge along the street on the southeast part of the grounds has been removed, and in its place stands an ornamental and substantial iron fence. The outside water-closets have been furnished with the most approved fixtures and, with a single exception, all the closets on the premises are now connected with the sewer. The outbuildings and fences have been painted, and the entire establishment has been carefully examined and defects removed and improvements adopted, to the full extent that the amount of the appropriations for these purposes would permit.

GYMNASIUM AND DRILL-HALL.

There can be no public educational institution in which conveniences and appliances for physical culture are more necessary than in a school for the blind. The fact of blindness, and the consequent difficulty in engaging in the ordinary romps and games of childhood, render it most probable that a blind child will be physically weak and of imperfect bodily development. Often petted and neglected at home, permitted to do nothing for himself which can possibly be done for him, or allowed and required to occupy some out-of-the-way corner, for days and perhaps weeks at a time, he frequently comes to us with a "hollow chest," a pale face, flabby muscles, unsteady and timid in movement, and largely lacking in those physical qualities so essential to healthy and vigorous mental action. Our first work is with the body. The pupil must be induced, and if necessary required, to take exercise. All the muscles if possible must be brought into healthy action. To do this work properly, a well equipped gymnasium furnished with all the modern appliances is almost indispensable. We ask an appropriation of $10,000 for this purpose.

KITCHEN AND BAKERY.

The enlargement of the chapel enabled us to enlarge the dining-room under it, which now furnishes ample accommodation for two hundred pupils. The kitchen, however, is small, inconvenient, and without many of the culinary implements

usually found in similar institutions. Our bread is, from necessity, baked in one of the city bakeries. It is believed that, with proper facilities for preparing and cooking the food, the quality might be improved and the expense diminished. For the building of a suitable kitchen and bakery, and equipping them with rotary oven and other needed appliances, we ask the appropriation of $10,000.

BOILER-HOUSE AND BOILERS.

The girls' cottage is to be heated with steam from the boilers, which have heretofore been used for heating the main building, laundry, and shop only. To provide for the certain maintenance of a proper temperature in extreme cold weather, another boiler will be required. This necessitates an addition to the boiler-house. The entire roof of the boiler-house is in bad condition, and it should be re-tinned and otherwise repaired. For the purpose of purchasing and setting another boiler, and making the necessary additions and repairs to the boiler-house, we ask an appropriation of $3,640.

MANUAL TRAINING DEPARTMENT.

In former years, it has been our custom to require the boys in the school to complete their work in the literary and musical departments, before entering the shop. Following along the line of a deservedly popular educational reform, it is now proposed to require pupils above the kindergarten grade, to do some work daily in the shop department; to educate, not first the head and then the hand, but the head and the hand together. In passing, it may not be improper to say that it is also proposed to give attention daily to the intellectual training of the adults in the workshop, while the moral culture of both old and young, will receive a large share of earnest effort. All, if possible, must be made to realize that "the three H's that win are Head, Hand, and Heart."

The boys, while members of the school, and while they are receiving the usual mental and moral training, will be taught to cane chairs, to make brooms, to weave carpets, to make mattresses, etc.; in a word, they will learn to do the work now done in the workshops by blind men. Moreover, the scope of the industrial department will be enlarged, and made to embrace other occupations. The experience of the blind and of teachers of the blind in other states and other countries will be put under tribute, in arranging for and providing those employments for the sightless that are best adapted to their circumscribed abilities.

It is also proposed to devote more time to the training of the girls in the various industries in which blind women are capable of acquiring skill. Experience shows that they can learn to operate the sewing-machine, the knitting-machine, to

knit and to sew by hand, to crochet, to make and repair their own clothing, to make baskets, to cane chairs, to make nets and hammocks, to perform domestic duties, such as sweeping, making beds, washing dishes, and even, in cases of necessity, making bread and cooking meats and vegetables. It may not be improper here to state that, in one institution for the blind, a cooking-school is an important feature of the work, and that it is by no means uncommon for the superintendent to find on his table some delicacy that has been prepared by the careful hands of a blind pupil. It is our desire and plan to devote more time and attention to the industrial needs of those committed to our charge, and to do this, in part at least, in those years which, too often, are given up wholly to mental and moral training. By this departure from the old method, we hope more nearly to accomplish the object for which the institution was established, which, in the language of the statute, is "to promote the intellectual, moral, and physical culture" of the blind, and "to fit them, as far as possible, for earning their own livelihood and for future usefulness in society." To accomplish these most desirable results, a greater number and variety of industrial appliances should be provided. We therefore ask an appropriation of $3,000, to be expended in fitting up pupils' work-rooms and supplying them with the necessary appliances.

ORDINARY EXPENSES.

In view of the added expense of heating and lighting the cottage for girls, of the sharp advance in prices of many articles of food, and of the unmistakable indication of a largely increased attendance, we ask that the appropriation for ordinary expenses be increased from $38,000 to $40,000 per year.

SUMMARY OF DESIRED APPROPRIATIONS.

Ordinary expenses, $40,000 per year, or	$80,000
Repairs and improvements, $2,000 per year, or	4,000
Gymnasium and drill-hall	10,000
Kitchen and bakery	10,000
Boiler, and addition and repairs to boiler-house	3,640
Industrial appliances	3,000
Maintenance of library, $200 per year, or	400
Total	$111,040

ORCHESTRA.

Owing to the death of Prof. T. D. Nutting, who had long and faithfully served the institution as teacher of the violin, leader of the orchestra, etc., the work of instruction in this department was abandoned during the last half of the last term, until the services of a competent instructor could be procured. Such an instructor has now been employed in the person of

Prof. M. H. Grist, of Baltimore, a thoroughly educated musician, who has for many years done similar work in the Maryland Institution for the Education of the Blind. Instruction in this line will be resumed with the opening of the next term.

SUPERINTENDENT.

A vacancy in the position of superintendent having occurred, through the expiration of the late incumbent's term of office, we have appointed Prof. Frank H. Hall, of Aurora, superintendent. Prof. Hall's high standing among the educators of the state, his demonstrated ability as an executive officer, his many admirable traits of mind and heart, and his extended and successful experience in positions calling into exercise the qualities and faculties required of one capably filling this position, seem to amply justify our action, and lead us to expect for the institution, under his wise and humane management, an enlarged measure of usefulness.

Respectfully submitted, this 30th day of August, A. D. 1890.

A. C. Wadsworth,
N. W. Branson,
B. F. Funk,
Trustees.

SUPERINTENDENT'S REPORT.

To the Board of Trustees:

GENTLEMEN—I have the honor to submit herewith the twenty-first biennial report of the Illinois Institution for the Blind, for the years 1888-9 and 1889-90, according to custom and law.

HEALTH OF PUPILS.

There were two deaths among the pupils in the institution, during the past two years, and from the same cause—consumption.

The first was Mary Caroline Rutherford, a bright young colored woman of Griggsville, who died February 11, 1889. She was a studious girl, in the senior department, and a gifted musician.

On April 4, 1889, William Taylor, of Mound City, died. This is the young man who so often puzzled and delighted visitors by his exhibition of skill in multiplying. He was a source of wonder to teachers and experts, and all who heard him were astonished at his mathematical gifts. His parents were poor colored people, and died when William was quite small. By careful training he would have become famous as a mathematician.

We had, during the past year, more sickness than in any previous year in the past thirty-five years, but under the skillful treatment of the institution physician, Dr. H. K. Jones, all recovered. Dr. Jones deserves special mention for his devotion to the institution in all its interests, for over a quarter of a century, and more especially for his successful medical treatment during this long connection.

I have to chronicle the death of Isabel Hunt, who died at her home, near Girard, in May, 1890, of consumption. Isabel was a painstaking student, and was beloved by all who came in contact with her.

NUMBERS.

The enrollment for 1888-9 was 171 pupils, and for 1889-90 it was 188 pupils. A large attendance is not always desirable, unless the pupils are of the right age and proper character.

There would have been no difficulty in increasing the enrollment, but it would not have been beneficial to the school. I selected from the list of applicants those most likely to be benefited, and I am sure it was a just policy to all concerned.

MILITARY DRILL.

My honored father, Dr. F. W. Phillips, had decided to add a military drill and course in gymnastics, and it fell to my lot to carry out his designs. In October, 1888, engaging the services of Mr. C. A. Hinchee, a competent young man in military matters and a teacher of the stenograph, I formed two companies,—one of sixteen young men, and the other of sixteen boys,—known as companies "A" and "B." Their progress was slow, but finally, after many discouragements, it was found that the sightless could drill. Upton's tactics were used, in order that these soldiers might be intelligent among their more fortunate, but perhaps no better drilled, fellow-soldiers. All who took part in the drill were much benefited in improved step and carriage, and a freedom and firmness of step never before seen in this institution. The drill also awakened great interest in the minds of the people in regard to the needs and possibilities of the sightless. This interest was shown in having a place assigned the "Blind Cadets" in the centennial procession in this city, April 30, 1889. The repute of this unique military organization having been known, invitations came to have the cadets drill in Peoria, at the soldiers' reunion, August 28, 1889; in the city of Rockford, at the Winnebago county fair, September 6, and at the state fair, at Peoria, September 24 and 25, 1889. These invitations were accepted, and it is a source of regret that we could not accept other calls; but, owing to conflict in dates, we were unable to do so. The cadets enjoyed the sights and sounds seen and heard on these occasions, and gave the people an opportunity to see what was done in this branch of development at their institution.

KINDERGARTEN.

Having secured the services of Miss Margaret H. Taylor, a teacher of experience and reputation, I selected the largest and best room at my command, and had it fitted up for a kindergarten which should be in keeping with the character of the institution. Miss Taylor went to work with a will, and has developed a kindergarten second to none.

ORCHESTRA.

On November 14, 1889, Prof. T. Dwight Nutting was injured accidentally, and died from the result of the blow on Monday, November 17, 1889. This sad occurrence deprived the institution of its oldest teacher, and was a great loss to the pupils under his instruction. Mr. Nutting was an earnest, conscientious

teacher, whose many years' experience with the sightless made him understand their methods of instruction and their needs. His death was so unexpected, occurring in the middle of the term, that your board deemed it best not to secure a successor; so all instruction pertaining to orchestral instruments ceased, though practice was continued.

LITERARY AND MUSICAL DEPARTMENTS.

The literary and musical departments are in a flourishing condition. The corps of faithful instructors deserve mention for their devotion to their pupils. They have all done good work in the past two years, and the results have been gratifying.

ENTERTAINMENTS.

It has been the custom of this institution for many years, to have entertainments for the instruction and amusement of the pupils. I wish to express our thanks to those who contributed to the pleasure of the pupils and would name Mr. Clarence Eddy, Miss Christine Neilson, Miss Genevra Johnston, Mr. Seth Crane, Col. Theo. Ewert, and many friends in this city who have aided us.

For favors shown the officers and pupils of this institution, I return thanks to the officials of the Wabash, Chicago & Alton and Jacksonville Southeastern Railways.

Also to the publishers of the following newspapers for donating a copy to pupils: Saturday Evening Herald, Saturday Review, Goodson Gazette, Our Reporter, Home Visitor, The Tablet. Also to the Jacksonville Daily Journal and Illinois Daily Courier and the press of the state for kind notices of our work.

GRADUATES.

Those completing the course and receiving diplomas in 1889, were: John B. Curtis, Cook county; Katie Hayes, Marion county; Alice Mifflin, Wayne county; Alexander Wagner, Woodford county.

Those completing the course in 1890, were: Lee Hancock, Cook county; Henry Hertzberg, St. Clair, county; Henry Hokamp, Adams county; Floy Houston, Cook county; Helene Tiedemann, St. Clair county.

FAREWELL.

In laying down a work in which I had been so long engaged, and which I had just begun as superintendent, I can but feel sad. The work of the blind, in all its phases, is very dear to me, and I do not retire from it without many regrets.

I have served the state and the cause of the unfortunate with all my ability, and I can safely leave it to the people to inquire how well that service has been performed. I wish the institution the greatest success, measured in any way or from any point of view.

I have the honor to be, your obedient servant,

WILLIAM S. PHILLIPS,

Superintendent.

Total	$217,635 55

NOTICE TO APPLICANTS.

The school year commences on the second Wednesday in September, and closes on the first Tuesday in June, of each year. It is very important that every pupil be on hand the day school begins, and remain until it closes.

As a rule, none are admitted under ten nor over twenty-one years of age, but the trustees have discretion in all cases. The shop is open to all who can learn a trade.

No persons incapable of receiving instruction, from physical infirmity or imbecility, or of unsound mind, or of confirmed immoral habits, will be knowingly received or retained in the institution. The inmates are not allowed to use tobacco.

Scholars, resident of Illinois, will be provided with boarding, washing, etc., at the expense of the state. Their friends will be required to supply them with comfortable clothing, and be at the expense of their traveling to and from the institution.

Two full suits of clothing should be sent with each pupil, and every piece marked with his or her name.

No person should be brought to the institution as a pupil until a letter of admission has been received from the superintendent, to whom all letters for information should be addressed, at Jacksonville, Illinois.
